**Subject:** RE: Lead cleanup video

I don't think getting video of the property restoration is needed for our education campaign with the city. The city's concerns are focused on what extraordinary measures does EPA implement to ensure no dust exposure to residents during the cleanup and as trucks of contaminated soil move in and out of the construction zone how are we ensuring clumps of contaminated soil aren't dropping off the trucks and spreading contamination.

However, if you believe capturing restoration video would complement the existing video for more general informational purposes, then go ahead.

**Subject:** RE: Lead cleanup video

Ruth said that they will be laying down clean soil next week in Pilsen. They are at the end of this part of the cleanup. Do we still want to videotape it for other purposes?

**Subject:** RE: Lead cleanup video

Do you think this is video we could get at Pilsen, or are they doing things differently in Jacobsville?

Jeff, I don't know what was being planned for video at Jacobsville, but yes additional shots of dust, water management and assuring clumps of contaminated dirt aren't falling out of our trucks is important.

**Subject:** RE: Lead cleanup video

I talked to Bob about the video this morning and he told me the same thing – we need to focus more on dust and water management and truck traffic. We could try to splice SulTRAC video into this, or we can send John back out to Pilsen ... whichever you think would work best.

**Subject:** RE: Lead cleanup video

Thank you Jeff. Looks great. Michael is working with SulTRAC, our contractor performing lead clean ups at the Jacobsville site, to shoot additional video. Dust and

water management at the site and truck traffic/potential for contamination of the streets were the issues raised specifically by the city.

**Subject:** Lead cleanup video

Ruth Muhtsun and John Ciccarelli worked together over the past couple days to pull together a short video of Steve Faryan explaining how we're cleaning up lead-contaminated soil in the Pilsen neighborhood, with a special emphasis on steps taken to protect residents from dust and other contamination. This video might be helpful in briefing the city of East Chicago ... it's not ready for public release, yet, but you can watch it at [https://youtu.be/\\_95dX2jlvxl](https://youtu.be/_95dX2jlvxl). Feedback/suggestions are welcome.
